Combs
 J.O. Combs Unified School District

SWCMA "After School Martial Arts Program" is an age and ability appropriate, specially designed training program that teaches more than just karate. Karate helps the participants to develop focus and discipline. The Martial Arts are primarily focused on following a series of traditional rules, forms, and techniques. As such, behavior and courtesy are considered to be the foundation of this ancient art form. Martial Arts helps children by directing their focus to a positive means of expression and better listening skills. Martial Arts provides an excellent environment for developing behavior and attitude. It gives your child the chance to explore his or her innate powers. Through Martial Arts children increase in strength, flexibility, endurance, balance, and harmony. Yet this is only the start. A strong sense of self control, self discipline, self esteem, self respect, and self confidence are cultivated which empower children for success in school and other aspects of life. All of these elements help children cope with life's challenges socially and help with personal success in school, sports and at home.

Rank Promotion: Students are evaluated on techniques and skills that they have learned. Rank Certificates will be presented at the end of each session.

Register on line www.swcma.com ONLY \$90 for 6 weeks of classes!
