SFE is excited to introduce the My School Menus™ to your school district. My School Menus™ allows you to quickly and easily access daily menus, nutrient fact labels, meal prices, and allergens. A nutrient calculator and allergen filter ensures that all students, parents, and teachers have a healthy meal option everyday! It will also enable you to plan meals in advance, which can assist in counting calories/points. Additionally, by having access to our online menus, we believe it will help you make healthier choices, as you will have access to nutrition information for the school meal programs right at your fingertips.

It is important to SFE that you have access to the best nutrition because we care about your health. We are excited about My School Menus™ which enables parents, students, and teachers to make healthy food choices 24 hours a day, 7 days a week, 365 days a year!

Parents of Page USD can access this service by going to your district's food service page at pageusd.org, click on school menus and select your child's school and menu (breakfast or lunch). Parents can look daily at menu selections and nutritional information. SFE looks forward to working together to utilize this app as one more tool to provide your students and community with the best nutrition possible. If you have trouble accessing My School Menus™ or have questions, contact Angie Lovett at (928) 608-4102.
