

Seasonal Flu Shots are Available for District One Students
Supplies are Limited

Vaccination against flu is especially recommended for children with a history of asthma, diabetes, or other chronic conditions; but we encourage all children to also be vaccinated to prevent widespread flu exposure and loss of school days.

Children who have insurance that pays for vaccinations **MUST** get their shots from their doctor.

For full protection, it is recommended that children under age 10, receive a second dose one month apart. For your convenience, shots are available at Alice Byrne Elementary for \$10 with signed parent consent – be sure to bring your child’s shot record so their records can be updated.

Thank you all for promoting good “**Handwashing**” and “**Cover-the-Cough**” practices with your children . . . it certainly helps us all to be a bit healthier!
