About me: I have been studying music for over 20 years, and received a Bachelors degree in Jazz Studies along with a performance certificate at the University of North Florida. I play numerous instruments at the professional level, and have performed in over a dozen countries in Europe and Asia, and in much of the Continental U.S.

I have shared the stage with numerous acts, like George Benson, Nestor Torres, and Joan Rivers, and am a musician at Walt Disney World. I have had much success as a private teacher and clinician, and am in very high demand in the Central Florida area as a clinician.

I look forward to working with the students at St. James, and to build the program up to something special!
