Keystone Learning Academy to provide on-site daycare at Wallace Elementary

The West York Area School District (WYASD) is pleased to announce the Board of Education approved an agreement with Keystone Learning Academy (KLA). KLA will be providing an on-site daycare center for children enrolled in the District's half-day kindergarten program. KLA is an early childhood program that will support student literacy, writing, mathematics and science in an age-appropriate manner. **Implementation of this innovated program gives West York parents a chance to have their students in a program before or after their half-day kindergarten program at West York, while staying in the same building.** This great use of the new addition to Wallace Elementary will benefit both the school district and West York families and another example of *Opening Minds Through Educational Excellence*.

For more information, please contact Dr. Emilie Lonardi, Superintendent.
