

SUMMER READING

May 16, 2016

Dear Parents,

The Lee Academy faculty and staff have received great feedback from our summer reading program. As always, we continue to strive for academic excellence at Lee Academy. This year we will continue the summer reading program for those students entering grades 7-9. These are the junior high students who participate in our Accelerated Reading Program.

Reading offers many benefits to students. Not only will students develop better reading comprehension skills, but they will also increase their vocabulary, spelling and grammar skills. It is evident in the classroom that students who are regular readers excel as writers, and reading proves to be directly linked to academic gains.

Students are required to read one book **OF THEIR CHOICE** this summer. The book **MUST** be on the AR list and must be grade level appropriate. They will then take an AR test when they return from summer break. You may check the availability of books at arbookfind.com.

*We hope your child enjoys his/her summer reading. Remember – **reading increases knowledge!***
