Statement from Superintendent John J. Ryan

On Wednesday July 29, 2015, San Manuel was hit with a massive storm causing damage throughout the town. First Avenue Elementary and San Manuel Junior/Senior High also suffered flooding issues.

The District has been working with the Arizona Risk Retention Trust (our insurance company) to insure that all damage is cleaned up and repaired.

Due to **water** damage at First Avenue Elementary and to the Junior/Senior High, some rooms cannot be used at this time. CRS Emergency and Construction Services has a crew working immediately to address the issues. Those classes affected by flooding (water damage) will be moved to other areas on their campus. Because some of the rooms have older tile, we must check for asbestos underneath the carpet/tile per governmental regulation. No students will be exposed during the clean-up phase.

I am told the relocation could take a minimum of six weeks. All rooms will receive new flooring/carpet and all materials will be replaced. School will begin on time on August 6, 2015.

Thank you for your support and patience.
