

The Laurel School believes that a consistent schedule with frequent breaks and sensory integration activities, use of assistive technology to support hands-on learning, and a strong emphasis on social thinking creates a summer environment where every student can thrive and have fun.

*While we are a school that serves children with mild/moderate learning differences, The Laurel School is not able to provide support for children with behavioral challenges

SUMMER ENRICHMENT PROGRAM

We invite you to join us at The Laurel School this summer for an exciting hands-on experience for children entering grades 1st - 8th in the fall. Our fun lineup of activities designed around a thematic S.T.E.A.M. approach will allow every child to find topics of interest where they can explore, learn, and tap into their creative mind.

Working on beautiful art projects; Coding Etch-a-Sketch with littleBits kits.

Adding art and design to core subjects teaches children to think more broadly and allows them to solve problems in creative ways.

With a combination of:

Science experiments, tinkering with **T**echnology through littleBits (a creative electronic based design studio), **E**ngineering our way through Lego Robotics and littleBits, exploring different ways to incorporate **A**rt into creative projects, and infusing **M**ath throughout...

There will not be a dull moment!

Additionally, we will have daily outdoor adventures (weather permitting), music, as well as classes geared for middle school students (new this year!). Check out our class offerings here or on our website (www.thelaurelschool.com).

SCHEDULE

JUNE 26, 2017 - JULY 28, 2017

Monday - Friday

8:30am - 4:00pm
