

Gifted and Talented Programs:

Each student in the East Orange School District is a unique individual with strengths to be nurtured and talents to be developed. The District is committed to nurturing the needs of the gifted students through an array of differentiated learning opportunities. These challenging learning experiences foster higher level thinking skills, provide opportunities for the full development of the students' capabilities, talents and gifts, and allow for the gifted and talented to learn concepts and generalizations in depth and complexity in the areas of language arts/social studies, math and science.

ADVANCED PLACEMENT (AP):

Advanced Placement (AP) courses are college level courses, provided at the high school level, for which students may receive college credits per examination(s) held in early May of each year. AP subject syllabi are approved each year by College Board, which must meet the rigor and relevancy equivalent to a college level course.
