

MINNESOTA VALLEY EDUCATION DISTRICT
SAFETY PLANS

These emergency procedures are designed to provide guidance to those having responsibility for the safety of pupils, school staff, and users of school facilities.

Common sense should dictate the reaction of school authorities to emergency situations. All situations CANNOT be neatly defined into a category for which hard and fast guidelines can be drawn. Individual judgment will need to be exercised in given situations. Continuing and meaningful efforts to prevent incidents that lead to emergency situations should be the area of greatest concern.

Directors or Program Supervisors of individual buildings or facilities have the primary responsibility for dissemination of emergency procedures to their staffs. In addition, they must set up a clearly defined chain of command so that safety procedures are carried out in case of their absence from the building.

In the event that the Director is not on duty at the time of emergency, the head custodian will take charge of the building and be responsible for the emergency at hand.

In the event that the emergency is such that more than one building in the school district is involved, the Director of Maintenance will coordinate those activities of the district.
